OUR SERVICES

PERSONAL TAX

We provide tax compliance services for partnerships and their partners. This involves preparing and filing the self-assessment tax returns for both the partnership and the partners and ensuring that any tax payments / repayments are made on time.

More recently, we have also been helping partnerships with any transitional issues arising from the basis period reform as we move towards reporting the partners' profits on a tax year basis rather than an accounting period basis.

In general, when dealing with a number of partners, we will charge a fixed fee for each partner's personal tax return.

In addition, we offer tax advisory services to support partners and partnerships across all areas of taxation. These services may involve:

- Tax planning to ensure that an individual's affairs are tax efficient.
- Succession planning – assisting with a client's objectives for passing on wealth to the next generation.
- Reviewing a partnership's compliance with matters such as the salaried members rules and payroll / benefits complications.
- Residence and domicile advice – in particular with new proposals for reform in this area.
- Resolving disputes with HMRC.
- Advising on the use of Family Investment Companies or Trusts.
- Assisting with property tax – for example on buying / selling property or running a property business.
- Advice on transactions such as share sales.
- Support with investments in Venture Capital Schemes.

Our fees for tax advisory services are based on our hourly rates and every effort is made to agree a fixed fee and the scope of work in advance.

- Corporate interest restriction returns
- Group loss allocations

We also provide tax advisory services to ensure that your business is structured tax efficiently whilst remaining in full compliance with UK tax legislation.
